

STANDLEY
BATCH SYSTEMS, INC.

**LEADING THE MATERIAL
HANDLING INDUSTRY
FOR 75 YEARS**

For more information about **STANDLEY BATCH PRODUCTS**
call **800.325.8084** or email **sales@standleybatch.com**

505 Aquamsi St. | Cape Girardeau, MO 63703 | 800.325.8084 | StandleyBatch.com

▶ **AUTOMATION/CONTROLS** -

Fully automated, totally coordinated systems with control panels that bring all stages of manufacturing - storage, measuring, blending and delivery - together to make your entire system efficient.

▶ **AGGREGATE BINS** - High or low profile aggregate bins can be built in the size and capacity to fit your needs.

▶ **CEMENT AND FLY ASH SILOS AND CEMENT BATCHING** - Silos can be ordered in any size or capacity. They are fitted with aeration pads, emergency slide gates, 4" blow pipes with Kamlock adaptors, PVR Manways and dust collectors.

▶ **MIXERS** - Standley Batch distributes and stocks **rapid** pan, twin shaft and planetary mixers in the United States. We also carry a complete line of replacement parts.

▶ **COLOR** - Color Batch Systems from Standley deliver the color mix, batch size and speed you need. Systems can be designed to serve up to four mixers.

▶ **CONVEYORS** - Whether it be an incline conveyor, shuttle conveyor, weigh belt, corrugated side wall conveyor, volumetric feed conveyor or a mud feeder conveyor, you receive accurate discharge of aggregates when and where you need it.

▶ **WEIGH BELT** - The weigh belt conveyor is mounted on load cells below the aggregate bins. Weigh belts will accurately weigh aggregates batch after batch.

▶ **VOLUMETRIC FEEDER** - Volumetric feeders allow for the accurate measuring and delivery of multiple types of aggregate simultaneously to a single transfer conveyor. Volumetric feeders enable a speedy turn around where one batching system may supply two or more mixers. Volumetric feeders will compensate for variations in moisture content of material to allow for a correct aggregate/cement ratio.

▶ **REPLACEMENT PARTS** - Standley Batch is your best source for **rapid** replacement parts for mixer paddles, liners and all other Standley concrete batching equipment.
