

Concrete

Muddog SlurryDry™

Muddog SlurryDry products are used for the solidification and stabilization of waste slurry and other fluids produced from concrete-related applications.

These products are designed to create solids to pass the Paint Filter Liquids Test (PFLT) and the Toxicity Characteristic Leaching Procedure (TCLP) for heavy metals. SlurryDry is a fast and easy way to solidify heavy concrete slurry sludge for jobsite disposal.

Features & Benefits

- Replaces high-collection, handling, hauling and disposal costs
- Protects from environmental fines

Technical Specifications

Formulation #	Particle Type	Bulk Density (lbs./ft³)	pH (1% dispersion)
SlurryDry HS	Semi-Granular	55 ± 2	6.5 - 7.5
SlurryDry LS	Semi-Granular	55 ± 2	6.5 - 7.5
SlurryDry QS	Semi-Granular	42 ± 2	5.5 - 6.5
SlurryDry SS	Powder	55 ± 2	6.5 - 8.5
