| Standard Covers | 1/4" x 1/8" | 3/16" x 1/16" | 3/16" x 1/16" 1/4" x 1/16" | 1/4" x 1/16" | 3/8" x 3/32" | 3/8" x 3/32" | 3/8" x 3/32" |
| Elongation at rated tension | Less than 2% | | | | | | |

Load Support Table (Maximum Belt Width)

| Material lb/ft³ and idler through | Trellex Supercord 500 | Trellex 250 | Trellex 375 | Trellex 500 | Trellex 600 | Trellex 800 | Trellex 1000 |
|--------------------------------------|-----------------------------|----------------|----------------|----------------|----------------|----------------|-----------------|
| 0-40 lb/ft ³ | | | | | | | |
| 20° Idlers | 66 | 42 | 60 | 72 | 84 | 84 | 84 |
| 35° Idlers | 60 | 36 | 54 | 60 | 72 | 84 | 84 |
| 41-80 lb/ft ³ | | | | | | | |
| 20° Idlers | 60 | 42 | 60 | 72 | 84 | 84 | 84 |
| 35° Idlers | 60 | 36 | 54 | 60 | 72 | 84 | 84 |
| 81-120 lb/ft ³ | | | | | | | |
| 20° Idlers | 54 | 36 | 60 | 60 | 72 | 84 | 84 |
| 35° Idlers | 48 | 36 | 54 | 60 | 60 | 84 | 84 |

Troughability Table (Minimum Belt Width)

| | Trellex Supercord 500 | Trellex 250 | Trellex 375 | Trellex 500 | Trellex 600 | Trellex 800 | Trellex 1000 |
|------------|-----------------------------|----------------|----------------|----------------|----------------|----------------|-----------------|
| 20° Idlers | 18 | 14 | 20 | 24 | 30 | 36 | 42 |
| 35° Idlers | 24 | 18 | 24 | 30 | 30 | 36 | 42 |

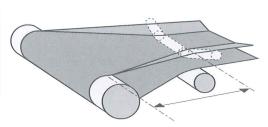

Minimum Recommended Pulley Diameter

| | Trellex Supercord 500 | Trellex 250 | Trellex 375 | Trellex 500 | Trellex 600 | Trellex 800 | Trellex 1000 |
|-----------------------------|-----------------------------|----------------|----------------|----------------|----------------|----------------|-----------------|
| Over 80% of Rated Tension | 24 | 16 | 18 | 24 | 24 | 30 | 36 |
| 60% to 80% of Rated Tension | 20 | 14 | 16 | 20 | 20 | 24 | 30 |
| 40% to 60% of Rated Tension | 18 | 12 | 14 | 18 | 18 | 20 | 24 |
| Up to 40% of Rated Tension | 16 | 10 | 12 | 16 | 16 | 18 | 22 |
| Tail & Snub Pulleys * | 16 | 10 | 12 | 16 | 16 | 18 | 22 |

^{*} Minimum diameters may be greater according to the type and size of fastener used, especially with wing-type pulleys. Consult fastener manufacturer's application data.

Transition Distance

| | | Applies to all styles of belt | | |
|---------------|-----------------------------|-------------------------------|--------------------|--|
| | | Pulley In-line * | Pulley Elevated ** | |
| 20° Idlers | Over 90% of Rated Tension | 2.1 x belt width | 0.9 x belt width | |
| | 60% to 90% of Rated Tension | 1.6 x belt width | 0.8 x belt width | |
| | Up to 60% of Rated Tension | 1.2 x belt width | 0.6 x belt width | |

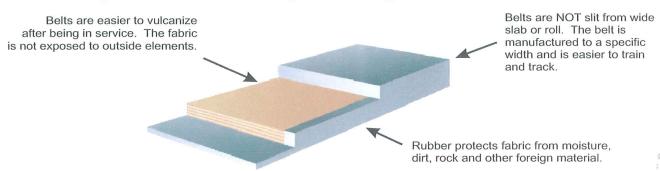

Metso Trellex Belts

Conveyor Belting

Metso Minerals has a wide range of conveyor belting to satisfy the rigorous demands of aggregate production and recycling operations. Metso Trellex conveyor belts are the product of more than 100 years experience in development, manufacturing and applications know-how.

Advantages of Molded Edge Belting

Specialty Belting

Depending on the operation, the materials flowing along the conveyor belt vary widely. Metso Trellex conveyor belting offers specialty belting alternatives, which provide a long, trouble free life, maximizing production uptime.

Metso Trellex Supercord 500

- Utilizes straight warp, all synthetic construction with standard Grade Y covers.
- Provides exceptional resistance to impact, ripping, and tearing when compared to conventional plied belting.
- · Straight warp fabric has extremely low stretch.

Steel Plus

 Available for applications which require a steel breaker integrated in the top cover. Improves rip and impact resistance. Stocked in metric widths.

STW A

- Conveyor belting utilizing high elastic steel cords in the warp and weft.
- Incredible impact and tear resistance.
- · Meets ISO 15236-2 specifications.

Optional Cover Compounds

- RMA Grade 2 Premium compound for a majority of abrasive applications.
- RMA Grade 1 Designed for superior resistance to cutting, gouging and abrasion.
- Premium Oil Resistant A compound designed to withstand attack in oily environments, such as oil treated coal and wood chips.
- Super Oil Resistant Designed for extreme oil resistant applications.
- K Flame Resistant Meets ISO 340 specifications.
- W Wear Resistant Top rated abrasion resistant compound designed for severe abrasive applications.
- TX Heat Resistant Superior quality SBR compound that provides excellent abrasion and good heat resistance to 150 ° C (300 ° F).
- RET Super Heat Resistant Premium EPR elastomer with excellent heat resistance to 250 °C (480 °F),
